4G Summit & Open Mobile Summit (4GS), a program of World Wireless Congress since 2000 is the foremost summit for presentation of advances in wireless and mobile communications. The summit offers a unique opportunity for engineers, scientists and investors working at the cutting edge of

wireless systems and mobile applications to maintain technical currency, and to network with global leading experts and executives in the 4G open mobile movement.

WHAT'S NEW

4GS has become the world's most authoritative technology summit and industry alliance on research, development, strategy and business of emerging wireless and mobile communications focusing on 4th generation open mobile and mobile Internet technologies in applications, services, signal processing, networking and radio systems. 4GS is also the international No.1 professional club for No.1 executives and experts in the field. Since its founding in 2000, 4GS has been fostering global R&D

collaborations and investment strategies for wireless innovation, invention and business, and has delivered over 80 premier technology special issues and featured topics in major professional publications including IEEE, ACM, Elsevier and ITU to reflect its worldwide leadership in the field and its prestigious standing in the industry. The congress is also an executive gathering that highlights the significant economic, political and commercial trends disrupting the global technology industries. 4GS features the most innovative companies, eminent technologists, influential investors and journalists in keynote speeches, panel debates and private company CEO showcases, and has the goal to identify the most promising entrepreneurial opportunities and investments, business opportunities and technical solutions in the global open mobile movement as well as mobile Internet offerings.

Driven by global industry leaders, 4GS has been playing active role in setting the world's technology standards and business strategies in next generation wireless and mobile technologies by recognizing the international leading executives and experts as keynote speakers of 4GS, and constructing an international platform in promoting open discussions between the world-class wireless industries and the world-class academic institutions. This 4GS mission has been strongly supported by leading international authorities, and sponsored by leading wireless industries including Intel, Qualcomm, Oracle, Siemens, Raytheon, Nokia, Samsung, LG, Alcatel, NTT DoCoMo, Motorola, Philips, Ericsson, Bechtel, Infineon, Hughes, Microsoft, Lucent, TI, Nortel, SAP, China Mobile, Huawei, Nvidia, ZTE, Yahoo, Vodafone, etc.

Previous Premier Sponsors for WWC - 4G Summit

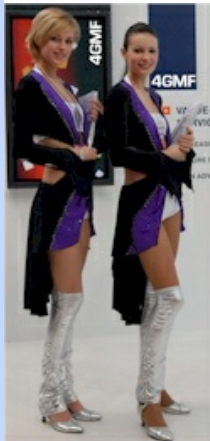

San Francisco Bay Area is the world's central hub of innovation, invention and business in Information and Communication Technologies, and has delivered numerous leading standards in the field on the worldwide basis. The Bay Area has also lots of best talents in the world, and represents the most advanced technological social community in this planet. Rooted in the Bay Area, 4GS is flushed with the spirit of freedom and openness in innovation, optimization and professionalism which are

the most authoritative technology references of the industry across the global, recorded in major libraries of over 50 countries.

The flagship 4GS keynote program is the industry's best-rated and most prestigious technology forum covering hottest and most emerging issues in wireless and mobile communications. Many medias including Wired, Business Week, Wall Street Journal and MIT Future Magazine called this Keynote Program as " **the most Honest technology conference**", " **the only place where executives can feel FREE to talk**", and " **a truly Professional as well as Technological meeting without**

hype". Therefore, the selection process of keynote speakers in 4GS is very strict, and selected speakers will be awarded the membership of "Mission 2020 Executive Leaders Club (called Mission 2020 Club)" in Los Altos Hills, California.

The cutting-edge wireless and mobile communications that are captivating users today are largely defined by the technology inside, particularly the hardware components and software IPs powering new gee-whiz capabilities. This technology is evolving quickly, making it imperative for leaders like you to accurately track the products, trends and opportunities shaping the future. The future is not to be predicted, it is to be created. We hereby invite you to this prestigious World Wireless Congress and hope you'll add your leadership to these discussions.

If you are interested in general speaking opportunities at the upcoming 4GS events, **please submit this Speaking Excel form** to: **speaker<at>4Gmobile.com**. Please write "4GS Speaker" in the e-mail "Subject" field.

If you are interested in submitting your research or technical papers to 4GS scientific & research proceedings, please send your full papers in Microsoft Word to: **paper<at>4Gmobile.com**. Please write "4GS Paper" in the e-mail "Subject" field.

If you have general enquiries about the 4GS such as sponsorship, exhibition and delegation, you can reach us by contacting [info<at>4gsummit.com](mailto:info@4gsummit.com) or [steve<at>delson.org](mailto:steve@delson.org).
